Patent

AMENDMENT

In the Claims:

1. (currently amended) A server for a network, the server enabling a user at a station to scan a document at a scanner, the server comprising:

a database of scanner drivers;

a driver selection system to enable the user to select a driver for the scanner from the database of scanner drivers in response to one or more inputs provided to a browser hosted at said station and received at said server over a data transmission network;

a destination selection system to enable said user to select a location from said browser for saving said scanning data; and

a delivery system to transfer said selected driver to said station.

2. (cancelled).

3. (currently amended): The server of claim ~~[[2]]~~ 1 wherein the predetermined location comprises a universal resource locator (URL) ~~or an electronic mail (e-mail) account address.~~

4. (currently amended) The server of claim ~~[[2]]~~ 1 wherein the predetermined location specifies a media to be used to save the scanning data.

Patent

5. (previously presented) The server of claim 1 further comprising a login system adapted to enable said user to access said driver selection system following establishing an identity of the user.
6. (previously presented) The server of claim 5 wherein the login system is adapted to correlate the identity of the user with an account on the server, and wherein the scanning data is saved in association with the account.
7. (previously presented) The server of claim 6 wherein the account comprises an e-mail account.
8. (original) The server of claim 6 further comprising a viewing system for enabling the user to view the scanning data saved in the account.
9. (original) The server of claim 1 wherein the selected driver is transferred to the computer in a self-extracting executable file format.
10. (currently amended) The server of claim 1 wherein the driver is adapted to be removed from the computer after the scanning data is saved in a ~~predetermined~~ said location.
11. (previously presented): The server of claim 1 wherein the server further comprises a network connection adapted to transmit information between said data

Patent

transmission network and at least one of said driver selection system and/or said delivery system.

12. (currently amended): A system comprising:

a scanning station, said scanning station comprising a computer connected to a data transmission network, said computer hosting a browser, and a scanner in communication with said computer; and

a server, said server comprising:

a database to store a plurality of scanner drivers;

a driver selection system to select one of said plurality of scanner drivers in response to one or more inputs provided to said browser and received from said data transmission network;

a destination selection system to determine a location for storing scanning data from inputs to said browser; and

a delivery system to transmit said selected driver to said computer over said data transmission network,

wherein said transmitted driver is adapted to enable said computer to store images captured at said ~~scanner~~ location.

13. (previously presented): The system of claim 12, wherein said server is further adapted to populate a menu viewable at said computer on said browser identifying two or more of said plurality of scanner drivers.

112. P55022
Patent

14. (previously presented): The system of claim 12, wherein said server is adapted to render said menu according to a hypertext transfer protocol.

15. (previously presented): The system of claim 12, wherein said server comprises a login system that enables said computer to access said driver selection system in response to authentication of said user.

16. (previously presented): The system of claim 15, wherein said server is adapted to store one or more cookies on said computer in response to said authentication.

17. (currently amended): A method comprising:
receiving information over a data transmission network from a browser hosted on a scanning station;
enabling selection of at least one scanner driver from a database storing a plurality of scanner drivers in response to said received information;
enabling selection of a location for storing scanning data in response to said received information; and
transmitting said selected scanner driver to said scanning station.

18. (previously presented): The method of claim 17, and further comprising:
authenticating a user at said scanning station in response to information received at said browser; and

112. P55022
Patent

enabling said selection of said at least one scanner driver in response to said authenticating said user.

19. (previously presented): The method of claim 17, wherein said receiving said information over said data transmission network comprises receiving said information according to a hypertext transfer protocol.

20. (previously presented): The method of claim 17, wherein said enabling selection of said at least one of said scanner drivers in response to said received information comprises receiving inputs from a menu rendered on said browser.

21. (new): The server of claim 1, wherein said location comprises an electronic mail (e-mail) account address.

22. (new): The system of claim 12, wherein the location comprises a universal resource locator (URL).

23. (new): The system of claim 12, wherein said location comprises an electronic mail (e-mail) account address.

24. (new): The server of claim 1, wherein said destination selection system is further adapted to:

determine whether said user has write permission associated with said location;
and

112. P55022
Patent

warn said user if said location is not a valid destination for storing said scanning

data.

BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ BLACK BORDERS
- ☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
- ☐ FADED TEXT OR DRAWING
- ☐ BLURRED OR ILLEGIBLE TEXT OR DRAWING
- ☐ SKEWED/SLANTED IMAGES
- ☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS
- ☐ GRAY SCALE DOCUMENTS
- ☒ LINES OR MARKS ON ORIGINAL DOCUMENT
- ☐ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
- ☐ OTHER: _____

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.
